## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-21, 25, and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The reference to "solving a series of equations" without specifically identifying said equations renders both claims indefinite and unclear. If applicant is referring to the detailed equations as limited by claims 25 and 27, the examiner suggests rectifying the problem by incorporating the limitations of these claims into claims 1 and 25, respectively. Such a modification would make the entire case allowable, as none of the cited prior art discloses or suggests identifying changes in the reactive coating as a result of the sensed evanescent fields influenced by the material, and comparing shifts in each long-period grating signature of a specific loss band so as to calculate different properties of said material.

### ***Allowable Subject Matter***

Claims 22-24 and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Or, the modification discuss above may be made as well.

Art Unit: 2874

Claims 28-34 are allowed. None of the cited prior art discloses or suggests identifying changes in the reactive coating as a result of the sensed evanescent fields influenced by the material, and comparing shifts in each long-period grating signature of a specific loss band so as to calculate different properties of said material.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No. 6,542,688 to Gaylord et al which discloses a related optical sensing device with a long period grating.

All of the prior art documents cited by applicant on the Information Disclosure Statement filed 03/19/2004 have been considered. Not the attached initialed copy of form PTO-1449.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
